

**SILVER OAK UNIVERSITY**  
**College of Technology(01)**  
**Diploma Engineering Course(CH/CE/IT/CL/EE/ME)**  
**Subject Name: Mathematics-I**  
**Subject Code: 1010272101**  
**Semester: 1st**

**Prerequisite:** Algebra, Trigonometry, Geometry and calculus

**Objective:** This course is designed to give a comprehensive coverage at an introductory level to the subject of Trigonometry, Differential Calculus and Basic elements of algebra.

**Teaching and Examination Scheme:**

Teaching Scheme					Evaluation Scheme				Total Marks
L	T	P	Contact Hours	Credits	Theory		Practical		
					CIE (TH)	ESE (TH)	CIE (PR)	ESE (PR)	
2	2	0	4	4	40	60	-	-	100

**Content:**

Unit No.	Course Contents	Teaching Hours	Weightage %
1	Trigonometry: Concept of angles, measurement of angles in degrees, grades and radians and their conversions, T-Ratios of Allied angles (without proof), Sum, difference formulae and their applications (without proof). Product formulae (Transformation of product to sum, difference and vice versa). T- Ratios of multiple angles, sub-multiple angles (2A, 3A, A/2). Graphs of sin x, cos x, tan x and e <sup>x</sup> .	10	25%
2	Differential Calculus: Definition of function; Concept of limits. Four standard limits $\frac{x^n - a^n}{x - a}$ , $\frac{\sin x}{x}$ , $\frac{a^x - 1}{x}$ , and $(1 + x)^{\frac{1}{x}}$ . Differentiation by definition standard functions $x^n$ , $\sin x$ , $\cos x$ , $\tan x$ , $e^x$ , $x$ . Differentiation of sum, product and quotient of functions. Differentiation of function of a function. Differentiation of trigonometric and inverse trigonometric functions, Logarithm and its basic properties, Logarithmic differentiation, Exponential functions.	10	25%
3	Complex Numbers: Complex Numbers: Definition, real and imaginary parts of a Complex number, polar and Cartesian, representation of a complex number and its conversion from one form to other, conjugate of a complex number, modulus and amplitude of a complex number Addition, Subtraction, Multiplication and Division of a complex number. De-moivre's theorem, its application.	08	20%
4	Partial fractions: Definition of polynomial fraction proper & improper fractions and definition of partial fractions. To resolve proper fraction	04	10%

	into partial fraction with denominator containing non-repeated linear factors, repeated linear factors and irreducible non-repeated quadratic factors. To resolve improper fraction into partial fraction.		
5	Permutations and Combinations: Value of $nPr$ and $nCr$ . Binomial theorem: Binomial theorem (without proof) for positive integral index (expansion and general form); binomial theorem for any index (expansion without proof) first and second binomial approximation with applications to engineering problems	08	20%
Total		40	100%

### Course Outcome:

Sr. No.	CO statement	Unit No
CO-1	To acquire necessary background in Trigonometry to appreciate the importance of the geometric study as well as for the calculation and the mathematical analysis.	1
CO-2	The ability to find the effects of changing conditions on a system and to understand rate of change	2
CO-3	To study complex numbers that enter into studies of physical phenomena in ways that most people cannot imagine.	3
CO-4	To perform the partial fraction decomposition that lies in the fact that it provides an algorithm for computing the antiderivative of a rational function.	4
CO-5	To understand the expansion using Binomial theorem	5

### Teaching & Learning Methodology: -

- (i) Focus on tricks of the trade and intuitive idea of Concept, use the main theorems as tools, no compromise on rigour, illustrative exercises under each topic, view point of applications
- (ii) Tutorial and Teacher guided Problem solving based pedagogy
- (iii) Topic based seminars, internet based assignments, teacher guided self-learning activities

**List of Experiments/Tutorials:** Unit wise/Topic wise Tutorials/Teacher Guided Problem Solving Sets are to be given for Practice and better understanding of Concepts and applications

**Major Equipment:** Nil
